#### 4.2 Operational Manual / Menu

Explanation

1. User Registration Management -

This module is available for any visitor of the system.

- Any visitor of the system can get registered to the system via user registration form.

To get register with this system the visitor should required valid e-mail address.

i. Log In –

Login is the sub-module of the user registration management. Login module is used to check whether the user is an authorized person to use the system or not.

This way email id entered at the time of registration will be verified and authenticated.

-At the time of first login to the system after registration, user will be asked to

Change his password.

ii. Password Retrieval Management -

- This module is available for all the basic users of the system.

- In case user does not remember his password, he can regenerate the password by going to Forgot Password wizard.

- User needs to provide his email id i.e. username, if the email id exists in registered user list then an automated email will be sent to that email id by the system containing a temporary password.

- User can then login using this temporary password and change the same later at his convenience.

The different type of users -

- Admin A person having full access of the application.
- Visitor/Basic User A person who registered to the system to apply for the online test examination.

2. Test Module

This module is available for basic user and also for admin user.

Test module helps to attend the test to the basic user Basic user can see the timeline of free and paid tests.

i) Test Configuration Management

This sub-module is available for Admin User.
Admin will be able to create and manage the test configurations for the users. This
Configuration is based on Exam Type + Test
Type + Difficulty Level.
E.g. Yellow Belt + Pre Test + Easy, Green

- E.g. Yellow Belt + Pre Test + Easy, Green Belt + Post Test + Hard, etc.

- This configuration can be modified at any point of time by Admin.

- It is mandatory that Admin is supposed to select configuration of the test whileuploading any test.

ii) Test Schedule Management

This sub-module is available for Admin User. - Admin will be able to create and manage a test schedule for all the tests.

- While creating a test schedule following information is to be provided:

- Test name
- Test configuration name (there can be multiple tests for the same configuration)
- Start date-time and end date-time
- Total no. of questions in the test.

3. Dashboard Management

- This module is available for Admin User and Basic User Also

- Admin can set information about the test for basic users on dashboard screen

- Basic User can get the information after the log in to the test series application on his home screen I e dashboard.

4. Report Management

- This module is available for Admin User.

- Admin can see the test report as per the user information details, test details, marks, grades and current situations.

5. Settings

- This module is available for the basic user and for admin user also.

-Basic user can edit the profile information from this module.

- Basic user also can change the valid email id and password with the help of this module.

- Admin user can also change the password with the help of this module.

### **Drawbacks and Limitations**

- 1) Test Series Application is not compatible with Internet Explorer
- 2) Test Series Application Support Management Module is under development.
- 3) The Online payment facility is not yet available to book the paid test series online in Test Series Application.
- 4) Test Series Application is only available for multiple choice answer type questions test, descriptive test series is not yet mentioned in the scope.
- 5) The monitoring and supervision for the test is the big issue for this test series application system.

### **Proposed Enhancements**

- 1) Application should be compatible with the Internet Explorer
- 2) Application should have the online payment facility for the paid test series
- Application should have the descriptive test series in futurewhich helps to improve the descriptive question & answers performance of the students
- 4) Application will taken care for the monitoring and supervision in actual test timing for the students.
- 5) A user (Super User) is required to manage the admin user.
